Formation to Computer Tools

Today, using a computer is common at home and at work. If we don't want to be excluded from numerous works and staying wired with young generations who like new technologies, it's very important to know how to use a computer.

That's why jjcortes.com organizes initiation courses about how to use PC or Macintosh micro computers and their main associated softwares (web browser, electronic mail, word processing, spreadsheet, picture retouch software, etc.).
